

Electromagnetic Position Sensors

Product range

Angular Sensors :

- Types : Synchros, Resolvers, RVTs and RVDTs
- Frameless or housed components
- Possible Standard Accuracy down to 20 arc seconds

Linear Sensors :

- Types : LVTs and LVDTs
- Standalone units or elements to be integrated
- Fuel or Hydraulic fluids immersion dedicated designs

Line Replaceable Units Custom Designs :

- Multiple channels
- Integrated Electronic Processing modules
- Integrated Mechanical features

Current Applications

- Engine Controls : Vanes, Valves, Nozzle, Thrust Reverser Doors position measurement
- Flight Controls : Cockpit Controls, Actuators, Surfaces position measurement
- Weapon Systems : Visors, Targetting Systems, Gimbals Servo-Controls
