

Electrical Power Generation & Conversion

Product range

Artus is a leader for airborne DC 28V generating systems.

- Static converters : Transformer Rectifiers, Inverters, regulated DC Power Generation, De-icing Systems
- Rotating machines : Emergency and Main AC & DC generators, advanced AC starter solutions
- State of the art technologies : built-in test features, soft switching techniques (patented), Aluminium winding, ...
- Customized solutions : weight saving, high level of EMI acceptance, improved safety and testability design

Current Programs

- Airbus : A320 family, A330/340, A380, A400M
- Bell-Boeing : V22 Osprey
- Eurocopter : NH90, Tiger
- EADS : TR85
